

Hi Jeanne,

Thank you for talking me through this today. Please find quote attached with Specs for the server. As I stated during our call. I would like to know if this server has the capacity to do the following:

1. Host our QuickBooks file and provide for remote accessibility (Most Important Action)
2. Host our company website along with employee portal
3. Bring all of our Office 365 accounts over
4. Have the ability to expand based on demand as the company grows
5. Migrate our email platform in house for up to 100+ employees
6. Anything else you can think to ask based on our discussion

I also had them quote out the cost to deploy these services in order to bring us online. I asked for five access users which include Flea, Donna, You and Myself (I will keep that 5th access open).

While I have a thought, we currently use DropBox that host our files sharing. I think that we will stay with this but may want to migrate this as well in the future.

I appreciate it! Look forward to hearing from you and Justin.
